

Installing wpEasyDocs & Premium

Installing wpEasyDocs plugin is the first step to take after purchase. The process is straightforward and if you have any experience at all with WordPress you should be familiar with it, as the installation is the same as for any other plugin.

1. Download the file

Once you've purchased the plugin, download the .zip file from the e-mail we sent you to your computer. The .zip file contains the latest version of the plugin.

2. Install the plugin

There are 2 ways to do this: The Preferred way is via the WordPress Admin. Open your WordPress admin panel, go to Plugins » Add new » Upload, and select the .zip file that you downloaded. In case the WordPress Admin Upload does not work, unzip the file that you downloaded. Open your WordPress installation folder using any FTP manager it could be FileZilla, Total Commander. Go to the wp-content/plugins/ folder of WordPress and upload the folder you previously unzipped (easy-docs or easy-docs-premium folder).

3. Activate the plugin

In your WordPress admin panel go to **Plugins**, find the EasyDocs plugin, and click **“Activate”**. That's it!
